

# Vocabulary Enrichment Module (V.E.M.)

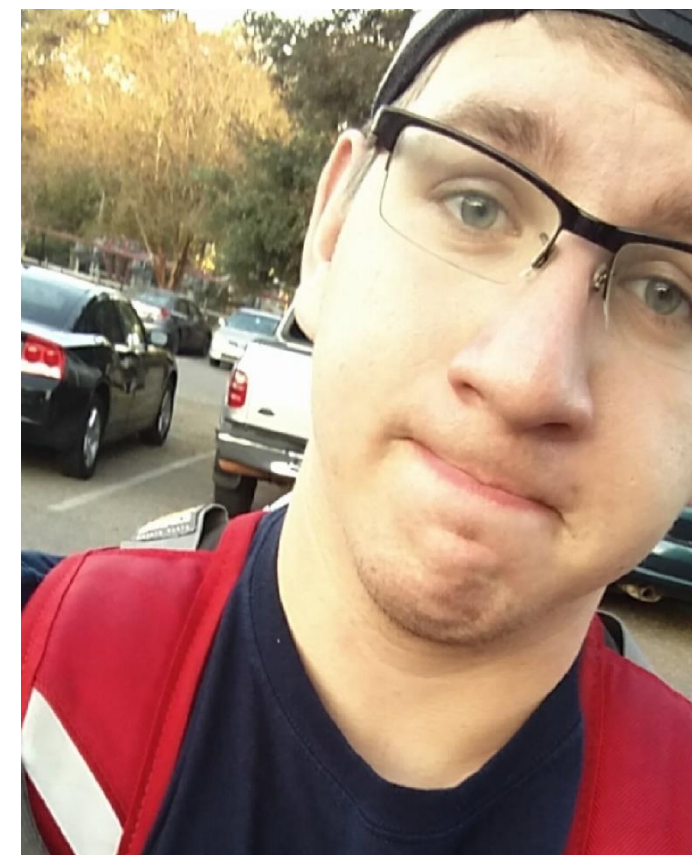

University of South Alabama || Dr. Robert Sweeney || CIS 497 - Senior Project - Spring 2016

## Description

The project consists of an interactive website that enhances students' comprehension of vocabulary terms for the course ISC 245. It will provide students with a fun, interactive way to learn course terms and definitions and give students feedback on their comprehension of course terms. The project website will allow instructors a glimpse of students' comprehension of course terms via a Dashboard. By creating this platform, we hope to provide a bridge between students' comprehension of course-related terms and definitions and instructors' course objectives and expected outcomes.

 iSkysoft

## Zac Smith

I am a computer Science Major and an avid soccer player with an interest in web application development. My interest with computers started at a young age while building them.

## Project Client

- David Bourrie PhD.
- Assistant Professor USA School of Computing
- Shelby Hall 1207
- (251) 461-1761
- [dbourrie@southalabama.edu](mailto:dbourrie@southalabama.edu)

## Stakeholders

- Instructors
- Students
- School of Computing

## Emily Mason

I am an Information Systems Major. I have not really worked much but my previous job was at Newk's as a counter server. My interests are sports and enjoying life as much as possible.

## Andrá N. Fergus Jr.

I am an Information Systems Major at the University of South Alabama. I currently work at the Mobile County Sheriff's Office-Metro Jail Division. I'm from the Virgin islands. I have an Interest for database management and development in health and law enforcement organizations. I love swimming, cooking, traveling and soccer.
